

Sequel MGA

Carry out the full end-to-end MGA process,
all within one intuitive system

Manage your end to end process from product distribution and document production, to policy administration, accounting and reporting using a simple, intuitive and user friendly interface, designed to support your business needs.

Improve client service whilst reducing your costs

- Full cycle delegated authority management with automated workflow and referrals
- Issue and manage policies with quote and bind capability – zero rekeying required at any point in the policy process
- Distribution enabled – true online products for distribution through a broker network, or for direct online sales
- Dynamic document generation and management – enabling customer self service
- Includes out of the box endorsement and renewal workflows
- Full billing and accounting capabilities including statementing and multi-currency support
- Range of payment integrations including credit card and premium finance
- Integrates with the wider Sequel suite, providing enhanced schedule and claims management

Manage tasks faster and more fairly

- Deploy new products and go live in weeks with Sequel’s fully configurable product builder
- Visualise and act on client data in real time
- Work within a single system to manage your tasks, create policies, generate documents, send emails and more
- Prevent breaches of service levels with SLA tracking
- Intuitive and modern interface
- Advanced configurable automation using Sequel’s powerful workflow engine
- Rules-based – Implementation of rating rules and conditional questions to allow for simple or complex data capture logic
- Supports full Lloyd’s coverholder reporting standards including v5 bordereau production
- Build and bespoke your own reports using Sequel’s Enquiry builder
